

Flooring Solutions for Higher Education

Higher education facilities have many specialized flooring requirements, and Gerflor meets those challenges. Our high-tech floors support the performance needs of sports arenas, dorms, labs, classrooms and the many other high traffic areas on campus. Gerflor flooring solutions are hygienic, high-performing, long-lasting, easy to maintain and include a broad range of on-trend designs.

Health and Wellness

Our floors are FloorScore® certified, ensuring low VOC-emissions for a healthy environment. They have been third-party tested and ISO-certified, inhibiting viral and bacterial growth and contributing to a safer space for students to learn and play. Our flooring solutions deliver durability that stands up to heavy abuse in high traffic areas and offers stain and chemical resistance – for the long term.

High Performing Flooring

A high-performing campus has a diversity of high-performing flooring needs. From the shock absorption and energy restitution necessary for sports facilities to the fully hygienic floor and wall systems for labs, clinics and cleanrooms, Gerflor provides a portfolio of value-added options. In addition, Gerflor products are ideal for fast-tracked renovations, as tiles install quickly, minimizing downtime.

A Team of Experts

The Gerflor team of experts provides technical knowledge, problem resolution and design guidance for campus-wide flooring needs. Working with athletic directors, facility managers, architects and designers, Gerflor experts complement and assist schools in planning, installing, and maintaining every high performance environment on campus.

FUN FACTS

- Over 70 DI volleyball teams play on Taraflex sports floors
- Gerflor employs a unique, gravity-based process in one of our French LVT manufacturing facilities, saving 30% of energy per square foot compared with industry standards
- Gerflor formulations are 100% REACH® Compliant

LINOLEUM FLOORING

- Composed of 76% rapidly renewable content including linseed oil, wood and cork.
- Cost effective with easy maintenance
- Neocare™ solvent-free surface treatment offers excellent scratch resistance as well resistance to aggressive chemicals extending the life of the flooring
- Linoleum is Cradle to Cradle Certified® which is the global standard for products that are safe, circular, and responsibly made

TARAFLEX® INDOOR SPORTS FLOORS

- Highest level of safety – shock absorption minimizes the force of impact on the body and reduces long term injury risk and has twice the deformation around the foot giving better movement and rotation with less risk of injury
- Easiest sports floor to maintain - no wax for life and lowest total cost of ownership compared to other alternatives
- Proven to have over 20 years of life expectancy
- Taraflex has a wide range of both permanent and portable flooring

INTERLOCKING FLOOR TILES

- Solutions for installing over existing or challenging subfloors – minimizing downtime during renovation
- Modular product design for monolithic visuals
- No wax for life means fewer employee hours for daily maintenance
- Ideal for fast-tracked renovations as tiles install quickly for a seamless appearance
